Starting Point

Mr. Jakhongir

IELTS Instructor,
Customer

“”I am a band 9 instructor who has 10+ years of experience in this field. Due to the high demand and big number of students from various regions I decided to start giving online courses. But little did I know what I’m gonna face...”

Initial Problems

Many IELTS courses rely mainly on Telegram, where learning materials and activities can become scattered across chats and files.

For Students:

- **Difficulties organizing materials and tracking progress**
- **Limited structured teamwork and competitions**
- **Separate platforms for learning and educational resources**

For Teachers:

- **Manual attendance tracking**
- **Disorganized submissions and feedback**
- **Difficulty monitoring individual progress**
